kluster: An Efficient Scalable Procedure for Approximating the Number of Clusters in Unsupervised Learning

Hossein Estiri, Behzad A. Omran, Shawn N. Murphy

PII: S2214-5796(17)30361-1
DOI: https://doi.org/10.1016/j.bdr.2018.05.003
Reference: BDR 98

To appear in: *Big Data Research*

Received date: 24 November 2017
Revised date: 15 April 2018
Accepted date: 11 May 2018

Please cite this article in press as: H. Estiri et al., *kluster*: An Efficient Scalable Procedure for Approximating the Number of Clusters in Unsupervised Learning, *Big Data Res.* (2018), https://doi.org/10.1016/j.bdr.2018.05.003

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
