This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Whole person recovery systems are situated within general community recovery systems.
- Social care and health practitioners identified gaps more easily than assets.
- Social capital generation is essential for recovery capital and recovery to occur.
- Community Operational Research can serve as a vehicle for mobilising health assets.
- Community Operational Researchers can act as catalysts in systemic interventions.
