This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Robust and adaptive optimization methods are proposed for human resource planning.
- The adaptive method improves profit and reduces risk over a deterministic baseline.
- Methods are tractable and effective on real data from a global consulting company.
