Title: The negative effect of high-intensity shot-peening on the intergranular corrosion behavior of the Super304H austenitic stainless steel

Authors: Ruikun Wang, Qingwen Zhou, Zhijun Zheng, Yan Gao

PII: S0010-938X(17)31958-3
DOI: <https://doi.org/10.1016/j.corsci.2018.08.026>
Reference: CS 7662

To appear in:

Received date: 30-10-2017
Revised date: 6-8-2018
Accepted date: 9-8-2018

Please cite this article as: Wang R, Zhou Q, Zheng Z, Gao Y, The negative effect of high-intensity shot-peening on the intergranular corrosion behavior of the Super304H austenitic stainless steel, *Corrosion Science* (2018), <https://doi.org/10.1016/j.corsci.2018.08.026>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The negative effect of high-intensity shot-peening on the intergranular corrosion behavior of the Super304H austenitic stainless steel
