This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title:**Longstanding disease-free survival in idiopathic REM sleep behavior disorder: Is neurodegeneration inevitable?****Authors:**

1) **Chun Yao** *MSc PhD candidate**

Integrated Program in Neuroscience, McGill University, Montreal, QC, Canada

(email: chun.yao@mail.mcgill.ca)

2) **Seyed-Mohammad Fereshtehnejad** *MD MPH PhD**

Department of Neurology and Neurosurgery, McGill University, Montreal, QC, Canada

Division of Clinical Geriatrics, Department of Neurobiology, Care Sciences and Society (NVS), Karolinska Institutet, Stockholm, Sweden

(email: sm.fereshtehnejad@mail.mcgill.ca)

3) **Benjamin K. Dawson** *BSc*

Department of Neurology and Neurosurgery, McGill University, Montreal, QC, Canada

Medical Student, Faculty of Medicine, University of Ottawa, Ottawa, ON, Canada

(email: benjamin.dawson@mail.mcgill.ca)

4) **Amelie Pelletier** *PhD*

Research Institute of the McGill University Health Centre, Montreal General Hospital,

Department of Neurology, Montreal, QC, Canada

(email: amelie.pelletier@mail.mcgill.ca)
