This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose a polylogarithmic approximation algorithm for the AOP in directed graphs.
- A constant factor approximation algorithm for the AOP in undirected graphs is presented.
- An inapproximability result for the AOP is obtained.
- Approximation algorithms for the Mixed Orienteering Problem are given.
