To appear in: Journal of Logical and Algebraic Methods in Programming

Received date: 29 August 2014 Revised date: 9 July 2015 Accepted date: 21 September 2015

Please cite this article in press as: C. Camacho et al., Cost-related interface for software product lines, *Journal of Logical and Algebraic Methods in Programming* (2015), http://dx.doi.org/10.1016/j.jlamp.2015.09.009

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- In a previous paper we presented an algebra called SPLA to represent variability models.
 In this paper we present a cost extension for our formal model SPLA.
 This cost extension is used to represent the cost of producing a products in variability models.
