Biobleaching and combined biobleaching/Fenton-like processes for the treatment of urban anaerobically digested sludge: removal of heavy metals and improvement of the sludge dewaterability

J.-M. Fontmorin, Mika Sillanpää

PII: S1383-5866(15)30311-7

DOI: <http://dx.doi.org/10.1016/j.seppur.2015.10.061>

Reference: SEPPUR 12665

To appear in: *Separation and Purification Technology*

Received Date: 3 July 2015

Revised Date: 19 October 2015

Accepted Date: 27 October 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Bioleaching and combined bioleaching/Fenton-like processes for the treatment of urban anaerobically digested sludge: removal of heavy metals and improvement of the sludge dewaterability.

J.-M. Fontmorin^{*}, Mika Sillanpää
