

Author's Accepted Manuscript

Multi-objective optimisation of stent dilation strategy in a patient-specific coronary artery via computational and surrogate modeling

Georgios E. Ragkousis, Nick Curzen, Neil W. Bressloff

PII: S0021-9290(15)00714-9
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2015.12.013>
Reference: BM7479

To appear in: *Journal of Biomechanics*

Received date: 28 July 2015
Revised date: 2 November 2015
Accepted date: 3 December 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Multi-objective optimisation of stent dilation strategy in a patient-specific coronary artery via computational and surrogate modeling
