Validation of a Six Degree-of-Freedom Robotic System for Hip *In Vitro* Biomechanical Testing

Mary T. Goldsmith, Matthew T. Rasmussen, Travis Lee Turnbull, Christiano A.C. Trindade, Robert F. LaPrade, Marc J. Philippon, Coen A. Wijdicks

PII: S0021-9290(15)00557-6
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2015.10.009>
Reference: BM7369

To appear in: *Journal of Biomechanics*

Received date: 9 January 2015
Revised date: 14 September 2015
Accepted date: 9 October 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running Title: Hip Robotic Validation

Conflict of interest statement: The Steadman Philippon Research Institute and Smith & Nephew provided funding support for this research. CAW is currently an employee of Arthrex, but was not employed by Arthrex during his primary contribution to this study. RFL is a paid consultant for Arthrex, Ossur, and Smith & Nephew. CACT received funding from the Instituto Brasil de Tecnologias da Saude. MJP receives support from Smith & Nephew, MIS, ArthroSurface, DonJoy, Slack, Linvatec, and
