This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Blood and Interstitial flow in the hierarchical pore space architecture of bone tissue

MS version dated June 23rd 2014

Stephen C. Cowin and Luis Cardoso
The New York Center for Biomedical Engineering and
The Department of Biomedical Engineering
Grove School of Engineering of The City College and
The Graduate School of The City University of New York
New York, NY 10031, U. S. A.
