Thiazolidine-2,4-dione Derivatives: Programmed Chemical Weapons for Key Protein Targets of Various Pathological Conditions

Navriti Chadha, Malkeet Singh Bahia, Maninder Kaur, Om Silakari

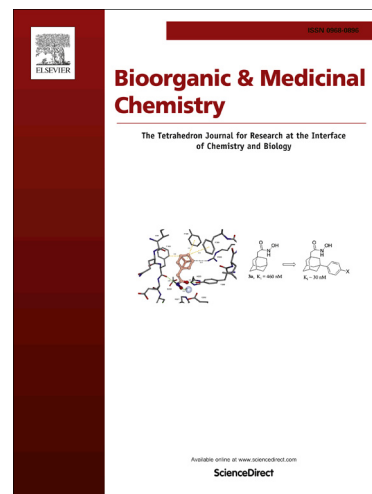

PII: S0968-0896(15)00267-9
DOI: <http://dx.doi.org/10.1016/j.bmc.2015.03.071>
Reference: BMC 12197

To appear in: *Bioorganic & Medicinal Chemistry*

Received Date: 16 February 2015
Revised Date: 26 March 2015
Accepted Date: 28 March 2015

Please cite this article as: Chadha, N., Bahia, M.S., Kaur, M., Silakari, O., Thiazolidine-2,4-dione Derivatives: Programmed Chemical Weapons for Key Protein Targets of Various Pathological Conditions, *Bioorganic & Medicinal Chemistry* (2015), doi: <http://dx.doi.org/10.1016/j.bmc.2015.03.071>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
