

Bioorganic & Medicinal Chemistry Volume 21, Issue 16, 2013

Symposium-in-Print

Carbohydrate-Processing Enzymes

Edited by:

Prof. Benjamin G. Davis

Contents

BMC Preface

Benjamin G. Davis

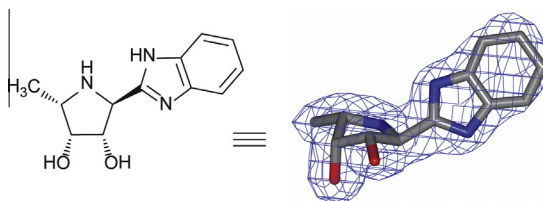

pp 4749–4750

ARTICLES

Three dimensional structure of a bacterial α -L-fucosidase with a 5-membered iminocyclitol inhibitor

Daniel W. Wright, Antonio J. Moreno-Vargas, Ana T. Carmona, Inmaculada Robina, Gideon J. Davies*

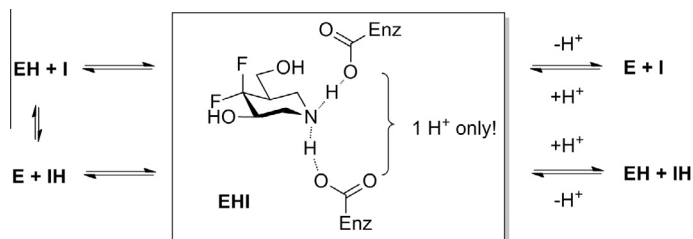

pp 4751–4754

Enzyme inhibition by iminosugars: Analysis and insight into the glycosidase–iminosugar dependency of pH

Óscar López, Feng-Ling Qing, Christian Marcus Pedersen, Mikael Bols*

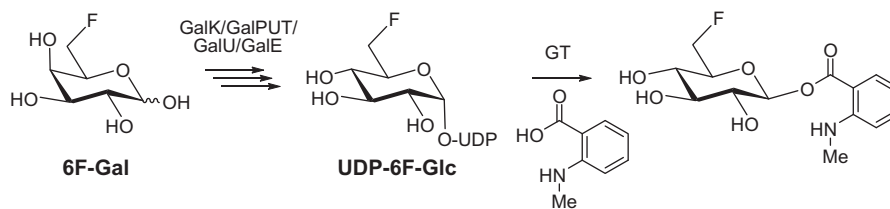

pp 4755–4761

A one-pot enzymatic approach to the O-fluoroglucoside of N-methylantranilate

pp 4762–4767

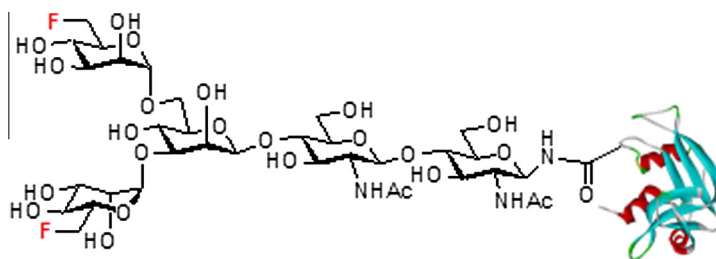

Lorenzo Caputi*, Martin Rejzek*, Thomas Louveau, Ellis C. O'Neill, Lionel Hill, Anne Osbourn, Robert A. Field*

Chemoenzymatic synthesis and lectin recognition of a selectively fluorinated glycoprotein

pp 4768–4777

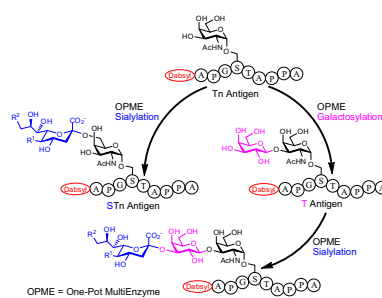

Jared Orwenyo, Wei Huang, Lai-Xi Wang*

One-pot multi-enzyme (OPME) chemoenzymatic synthesis of sialyl-Tn-MUC1 and sialyl-T-MUC1 glycopeptides containing natural or non-natural sialic acid

pp 4778–4785

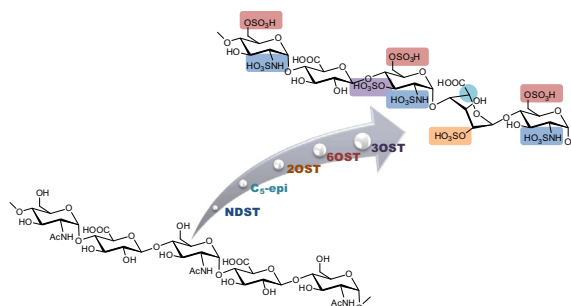

Hamed Malekan, Gabriel Fung, Vireak Thon, Zahra Khedri, Hai Yu, Jingyao Qu, Yanhong Li, Li Ding, Kit S. Lam, Xi Chen*

Use of biosynthetic enzymes in heparin and heparan sulfate synthesis

pp 4786–4792

Elizabeth P. Chappell, Jian Liu*
