

Accepted Manuscript

The inhibition of type I bacterial signal peptidase: Biological consequences and therapeutic potential

Arryn Craney, Floyd Romesberg

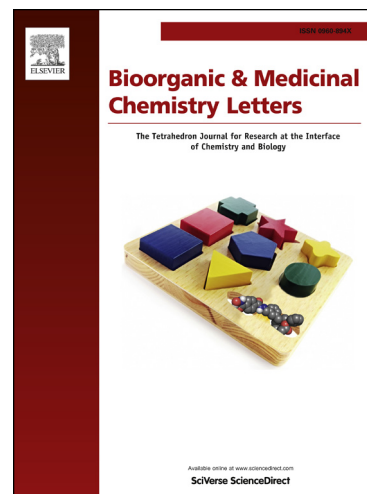

PII: S0960-894X(15)00776-3
DOI: <http://dx.doi.org/10.1016/j.bmcl.2015.07.072>
Reference: BMCL 22961

To appear in: *Bioorganic & Medicinal Chemistry Letters*

Received Date: 19 June 2015
Revised Date: 16 July 2015
Accepted Date: 21 July 2015

Please cite this article as: Craney, A., Romesberg, F., The inhibition of type I bacterial signal peptidase: Biological consequences and therapeutic potential, *Bioorganic & Medicinal Chemistry Letters* (2015), doi: <http://dx.doi.org/10.1016/j.bmcl.2015.07.072>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

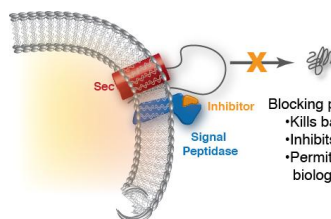

Graphical Abstract

To create your abstract, type over the instructions in the template box below.
Fonts or abstract dimensions should not be changed or altered.

The inhibition of type I bacterial signal peptidase: biological consequences and therapeutic potential

Arryn Craney and Floyd E. Romesberg

Leave this area blank for abstract info.

Blocking protein secretion:

- Kills bacteria
- Inhibits Virulence
- Permits unique chemical biology experiments
