

Journal of Controlled Release Vol. 168, No. 1, 2013

Contents

COVER STORY

Delivery of definable numbers of PLGA microparticles within embryoid bodies

Kinam Park

p 103

REVIEWS

Recent advances and future prospects of phyto-phospholipid complexation technique for improving pharmacokinetic profile of plant actives

Junaid Khan, Amit Alexander, Ajazuddin, Swarnlata Saraf, Shailendra Saraf *

pp 50–60

Photodynamic nanomedicine in the treatment of solid tumors: Perspectives and challenges

Alyssa Master, Megan Livingston, Anirban Sen Gupta *

pp 88–102

RESEARCH PAPERS

Size- and pathotropism-driven targeting and washout-resistant effects of boronic acid-rich protein nanoparticles for liver cancer regression

pp 1–9

Jing Wang, Zhaozheng Zhang, Xin Wang, Wei Wu *, Xiqun Jiang *

Doxorubicin was encapsulated in boronic acid-rich protein nanoparticles. In vivo antitumor examination in orthotopic liver cancer shows that these nanoparticles make tumor regression distinctly.

**Carrier free rapamycin loaded drug eluting stent: *In vitro* and *in vivo* evaluation**

pp 70–76

Wahid Khan, Shady Farah, Abraham Nyska, Abraham J. Domb *

GENE DELIVERY

On the efficacy of malaria DNA vaccination with magnetic gene vectors

pp 10–17

Fatin Nawwab Al-Deen, Charles Ma, Sue D. Xiang, Cordelia Selomulya *, Magdalena Plebanski, Ross L. Coppel

Magnetic gene vectors carrying plasmid malaria DNA vaccine encoding VR1020-PyMSP1₁₉ delivered *in vivo* with significantly higher serum antibody titers against PyMSP1₁₉ observed particularly with intraperitoneal injection.

**Gene silencing of TNF-alpha in a murine model of acute colitis using a modified cyclodextrin delivery system**

pp 28–34

J. McCarthy, M.J. O'Neill, L. Bourre, D. Walsh, A. Quinlan, G. Hurley, J. Ogier, F. Shanahan, S. Melgar, R. Darcy, C.M. O'Driscoll *
