Highly enhanced reduction of rare earth oxides in simulated oxide fuel in Li_2O - LiCl salt using lithium metal

Eun-Young Choi, Jeong Lee

PII: S0022-3115(18)30566-X

DOI: [10.1016/j.jnucmat.2018.09.017](https://doi.org/10.1016/j.jnucmat.2018.09.017)

Reference: NUMA 51198

To appear in: *Journal of Nuclear Materials*

Received Date: 20 April 2018

Revised Date: 11 September 2018

Accepted Date: 11 September 2018

Please cite this article as: E.-Y. Choi, J. Lee, Highly enhanced reduction of rare earth oxides in simulated oxide fuel in Li_2O - LiCl salt using lithium metal, *Journal of Nuclear Materials* (2018), doi: 10.1016/j.jnucmat.2018.09.017.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highly enhanced reduction of rare earth oxides in simulated oxide fuel in Li_2O – LiCl salt using lithium metal

Eun-Young Choi* and Jeong Lee
