Enhancing the shear strength and oxidation resistance of aluminum-chromium phosphate heat-dissipating coatings by the introduction of a micro arc oxidation transition layer

Zhikai Liu, Qiu Sun, Ying Song, Jiao Yang, Xiangqun Chen, Xiyuan Wang, Zhaohua Jiang

PII: S0257-8972(18)31024-7
DOI: doi:[10.1016/j.surfcoat.2018.09.041](https://doi.org/10.1016/j.surfcoat.2018.09.041)
Reference: SCT 23814
To appear in: *Surface & Coatings Technology*
Received date: 9 July 2018
Revised date: 25 August 2018
Accepted date: 16 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Enhancing the shear strength and oxidation resistance of aluminum-chromium phosphate heat-dissipating coatings by the introduction of a micro arc oxidation transition layer
