This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We use fixed point theory in a cone to study a hematopoiesis model.
- Our approach is novel compared with some related earlier results.
- Our approach does not involve compactness of the corresponding operators.
