Deterministic analysis of distributed order systems using operational matrix

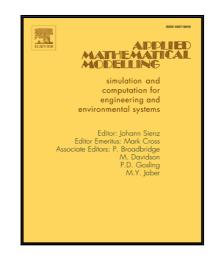

Pham Luu Trung Duong, Ezra Kwok, Moonyong Lee

PII: \$0307-904X(15)00569-7 DOI: 10.1016/j.apm.2015.09.035

Reference: APM 10734

To appear in: Applied Mathematical Modelling

Received date: 18 November 2014
Revised date: 22 June 2015
Accepted date: 22 September 2015

Please cite this article as: Pham Luu Trung Duong, Ezra Kwok, Moonyong Lee, Deterministic analysis of distributed order systems using operational matrix, *Applied Mathematical Modelling* (2015), doi: 10.1016/j.apm.2015.09.035

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- Novel approach using operation matrix for deterministic analysis of linear distributed order systems
- Reduce different analysis problems by using block pulse functions
- Address arbitrary input without knowledge of Laplace transform
- Accurate and efficient for deterministic analysis
