Wave motion analysis and modeling for membrane structures via wavelet finite element method

Zhi-Bo Yang , Xue-Feng Chen , Yong Xie , Hao Zuo ,
Hui-Hui Miao , Xing-Wu Zhang

PII: S0307-904X(15)00605-8
DOI: [10.1016/j.apm.2015.09.071](https://doi.org/10.1016/j.apm.2015.09.071)
Reference: APM 10770

To appear in: *Applied Mathematical Modelling*

Received date: 23 September 2014
Revised date: 30 June 2015
Accepted date: 22 September 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A wavelet-based method is proposed for wave motion simulation in membrane
- The wave motions in the intact and notched membranes are investigated
- Comparisons show the efficiency and accuracy of the proposed method
