This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Application of histogram analysis for the evaluation of vascular permeability in glioma
by the K2 parameter obtained with the dynamic susceptibility contrast method:
Comparisons with Ktrans obtained with the dynamic contrast enhance method and
cerebral blood volume**
