

Accepted Manuscript

Gravitational and electric energies in the collapse of a spherical thin-shell capacitor

Remo Ruffini, She-Sheng Xue

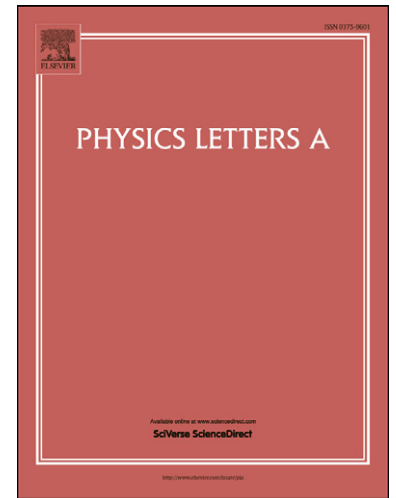

PII: S0375-9601(13)00676-2
DOI: [10.1016/j.physleta.2013.07.026](https://doi.org/10.1016/j.physleta.2013.07.026)
Reference: PLA 22092

To appear in: *Physics Letters A*

Received date: 28 May 2013
Revised date: 13 July 2013
Accepted date: 15 July 2013

Please cite this article in press as: R. Ruffini, S.-S. Xue, *Physics Letters A* (2013), <http://dx.doi.org/10.1016/j.physleta.2013.07.026>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Gravitational energy and electromagnetic energy in gravitational collapses.
- The solution to the Einstein equation for the collapse of a spherically thin capacitor.
- Gravitational collapses slowed down by radiating electromagnetic energy.
- The relations to the energetic and time-duration features of Gamma-Ray Bursts.
