Arsenic and 17- β -estradiol bind to each other and neutralize each other's signaling effects

Sukhdeep Kumar, Tapan K. Mukherjee, Purnananda Guptasarma

PII: S0006-291X(16)31005-1

DOI: [10.1016/j.bbrc.2016.06.087](https://doi.org/10.1016/j.bbrc.2016.06.087)

Reference: YBBRC 36003

To appear in: *Biochemical and Biophysical Research Communications*

Received Date: 8 June 2016

Accepted Date: 17 June 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Proposed Mechanism of ATO and E2 Inhibition of Estrogen Receptor Signaling
