Accepted Manuscript

Stem cell-derived vasculature: a potent and multidimensional technology for basic research, disease modeling, and tissue engineering

Justin Lowenthal, Sharon Gerecht

PII: S0006-291X(15)30644-6

DOI: 10.1016/j.bbrc.2015.09.127

Reference: YBBRC 34627

To appear in: Biochemical and Biophysical Research Communications

Received Date: 17 September 2015

Accepted Date: 23 September 2015

Please cite this article as: J. Lowenthal, S. Gerecht, Stem cell-derived vasculature: a potent and multidimensional technology for basic research, disease modeling, and tissue engineering, *Biochemical and Biophysical Research Communications* (2015), doi: 10.1016/j.bbrc.2015.09.127.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Stem Cell-Derived Vasculature: A Potent and Multidimensional Technology for Basic Research, Disease Modeling, and Tissue Engineering
