Peptides with dual mode of action: Killing bacteria and preventing endotoxin-induced sepsis

Klaus Brandenburg, Lena Heinbockel, Wilmar Correa, Karl Lohner

PII: S0005-2736(16)30001-3
DOI: doi: [10.1016/j.bbamem.2016.01.011](https://doi.org/10.1016/j.bbamem.2016.01.011)
Reference: BBAMEM 82105

To appear in: *BBA - Biomembranes*

Received date: 26 October 2015
Revised date: 13 January 2016
Accepted date: 18 January 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Peptides with dual mode of action: killing bacteria and preventing
endotoxin-induced sepsis**
