Targeting succinate:ubiquinone reductase potentiates the efficacy of anticancer therapy

Björn Kruspig, Kadri Valter, Belma Skender, Boris Zhivotovsky, Vladimir Gogvadze

PII: S0167-4889(16)30126-4
DOI: doi: [10.1016/j.bbamcr.2016.04.026](https://doi.org/10.1016/j.bbamcr.2016.04.026)
Reference: BBAMCR 17869

To appear in: *BBA - Molecular Cell Research*

Received date: 18 February 2016
Revised date: 12 April 2016
Accepted date: 28 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Björn Kruspig^{1,5}, Kadri Valter¹, Belma Skender^{1,3,4}, Boris Zhivotovsky^{1,2}, and Vladimir Gogvadze^{1,2}
