How synthetic membrane systems contribute to the understanding of lipid-driven endocytosis

Thomas Schubert, Winfried Römer

PII: S0167-4889(15)00251-7
DOI: doi: [10.1016/j.bbamcr.2015.07.014](https://doi.org/10.1016/j.bbamcr.2015.07.014)
Reference: BBAMCR 17627

To appear in: *BBA - Molecular Cell Research*

Received date: 20 February 2015
Revised date: 17 July 2015
Accepted date: 20 July 2015

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

How synthetic membrane systems contribute to the understanding of lipid-driven endocytosis

Thomas Schubert^{1,2} and Winfried Römer^{1,2}
