Notch activation augments nitric oxide/soluble guanylyl cyclase signaling in immortalized ovarian surface epithelial cells and ovarian cancer cells

Ahmed El-Sehemy, Alex Chang, Abul Kalam Azad, Nidhi Gupta, Zhihua Xu, Helen Steed, Aly Karsan, YangXin Fu

PII: S0898-6568(13)00288-X
DOI: doi: [10.1016/j.cellsig.2013.09.008](https://doi.org/10.1016/j.cellsig.2013.09.008)
Reference: CLS 7976

To appear in: *Cellular Signalling*

Received date: 17 August 2013
Accepted date: 6 September 2013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Notch activation augments nitric oxide/soluble guanylyl cyclase signaling in immortalized ovarian surface epithelial cells and ovarian cancer cells

Ahmed El-Sehemy², Alex Chang³, Abul Kalam Azad¹, Nidhi Gupta¹, Zhihua Xu^{1, 2}, Helen Steed^{1, 2}, Aly Karsan³ and YangXin Fu^{1, 2*}
