This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Submitted as a *Brief Communication to Molecular Genetics and Metabolism*

Retinal thinning in Gaucher disease patients and carriers: results of a pilot study

Alisdair McNeill^{1*} MRCP (UK), Gloria Roberti^{2*} MD, Gerassimos Lascaratos² MSc(Oxon) MRCSEd(Ophth), Derralynn Hughes³ DPhil FRCP, Atul Mehta³ MD FRCP David F Garway-Heath² MD FRCOphth, Anthony HV Schapira¹ MD FMedSci.

Word count: 947 words References: 14 Figures: 1

*these authors contributed equally to this work.

Statistical analysis: Dr Alisdair McNeill MRCP (UK), UCL Institute of Neurology.

1. Department of Clinical Neurosciences, UCL Institute of Neurology.
2. NIHR Biomedical Research Centre for Ophthalmology at Moorfields Eye Hospital NHS Foundation Trust and UCL Institute of Ophthalmology, London, UK
3. Lysosomal storage disorders unit, Royal Free Hospital, London.
