

## Accepted Manuscript

### Structural and Functional Diversity of Topologically Associating Domains

Job Dekker, Edith Heard

PII: S0014-5793(15)00814-5

DOI: <http://dx.doi.org/10.1016/j.febslet.2015.08.044>

Reference: FEBS 37354

To appear in: *FEBS Letters*

Received Date: 13 August 2015

Accepted Date: 28 August 2015

Please cite this article as: Dekker, J., Heard, E., Structural and Functional Diversity of Topologically Associating Domains, *FEBS Letters* (2015), doi: <http://dx.doi.org/10.1016/j.febslet.2015.08.044>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Structural and Functional Diversity of Topologically Associating Domains**

Job Dekker<sup>1</sup> and Edith Heard<sup>2</sup>

Keywords: topologically associating domain, long-range gene regulation, chromatin folding.
