Title: Finding the rules for successful drug optimisation

Author: Iskander Yusof Falgun Shah Tatsu Hashimoto
Matthew D. Segall Nigel Greene

PII: S1359-6446(14)00007-5
DOI: <http://dx.doi.org/doi:10.1016/j.drudis.2014.01.005>
Reference: DRUDIS 1329

To appear in:

Received date: 31-10-2013
Revised date: 10-12-2013
Accepted date: 13-1-2014

Please cite this article as: Yusof, I., Shah, F., Hashimoto, T., Segall, M.D., Greene, N., Finding the rules for successful drug optimisation, *Drug Discovery Today* (2014), <http://dx.doi.org/10.1016/j.drudis.2014.01.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Finding the rules for successful drug optimisation

Iskander Yusof¹, Falgun Shah², Tatsu Hashimoto³, Matthew D. Segall^{1,*} and Nigel Greene²

¹Optibrium Ltd, 7221 Cambridge Research Park, Beach Drive, Cambridge, CB25 9TL, UK

²Compound Safety Prediction, Pfizer Global Research & Development, Groton, CT, USA

³Massachusetts Institute of Technology, Cambridge, MA, USA

*Corresponding author: Segall, M.D. (matt.segall@optibrium.com).

Keywords: Multiparameter optimisation; rule induction; drug-like properties; hepatotoxicity; cardiotoxicity.

Teaser: Rule induction methods explore complex data to find interpretable, multiparameter rules, tailored to any drug discovery objective that can be used to identify compounds with a higher chance of clinical success.
