Dipeptidyl peptidase 9 enzymatic activity influences the expression of neonatal metabolic genes

Yiqian Chen, Margaret G Gall, Hui Zhang, Fiona M Keane, Geoffrey W McCaughan, Denise MT Yu, Mark D Gorrell

PII: S0014-4827(16)30039-8
DOI: <http://dx.doi.org/10.1016/j.yexcr.2016.02.020>
Reference: YEXCR10186

To appear in: *Experimental Cell Research*

Received date: 24 December 2015
Revised date: 25 February 2016
Accepted date: 26 February 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Dipeptidyl Peptidase 9 Enzymatic Activity Influences the Expression of Neonatal Metabolic Genes*

Yiqian Chen, Margaret G Gall, Hui Zhang, Fiona M Keane, Geoffrey W McCaughan, Denise MT Yu¹ and Mark D Gorrell

Centenary Institute and Sydney Medical School, University of Sydney, Sydney, New South Wales, Australia

¹ Current address: Children's Cancer Institute, Lowy Cancer Research Centre, University of New South Wales, Sydney, New South Wales, Australia

*Running title: DPP9 in neonatal metabolism
