

## Accepted Manuscript

Title: Hierarchic Genetic Strategy with Maturing as a Generic Tool for Multiobjective Optimization

Author: Radosław Łazarz Michał Idzik Konrad Gądek Ewa Gajda-Zagórska

PII: S1877-7503(16)30025-4  
DOI: <http://dx.doi.org/doi:10.1016/j.jocs.2016.03.004>  
Reference: JOCS 467

To appear in:

Received date: 31-7-2015  
Revised date: 18-2-2016  
Accepted date: 3-3-2016

Please cite this article as: Radoslaw Łazarz, Michał Idzik, Konrad Gądek, Ewa Gajda-Zagórska, Hierarchic Genetic Strategy with Maturing as a Generic Tool for Multiobjective Optimization, *Journal of Computational Science* (2016), <http://dx.doi.org/10.1016/j.jocs.2016.03.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Radosław Łazarz received M. Sc. (2014) in the area of structural pattern recognition at AGH University of Science and Technology, Kraków. Currently a Ph. D. student at Department of Computer Science, AGH UST. His research is focused mostly on machine learning in complex network analysis and evolutionary optimization techniques.

Michał Idzik received his M. Sc. (2014) in the area of natural language processing at AGH University of Science and Technology, Kraków. Worked on access layer for High Energy Physics experiments database on internship (2012) at CERN (The European Organization for Nuclear Research). His research interests include natural language processing, evolutionary algorithms, multiobjective optimization and data visualization.

Konrad Gądek got his bachelor of science degree in 2013 in the area of controlling mobile robot using Erlang at AGH -- University of Science and Technology, Kraków. Worked on lightweight concurrency and parallelism in OCaml on internship (2012) at Grenoble INP -- Institut polytechnique de Grenoble. Currently pursues M.Sc. in Computer Science in the area of multiobjective evolutionary algorithms. Works as a Haskell programmer. Interested in functional programming and type systems.

Ewa Gajda-Zagórska received her Ph.D. (2015) in the area of adaptive population-based algorithms at AGH University of Science and Technology, Kraków and M.Sc. (2009) in Computer Science at the Jagiellonian University, Kraków, Poland. She is a recipient of Google Anita Borg Scholarship 2013. Her research interests include evolutionary algorithms, complex metaheuristics, multiobjective optimization and inverse problems.
