This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Systematic Approach for Numerical Research of Realistic Shaped Particle-Fluid Interactions

Shengli Ma¹, Zhengying Wei², Xueli Chen²

The authors are Shengli Ma, lecturer, and Zhengying Wei advanced member of CMES, professor, Xueli Chen student. ¹Mechanical and Electrical Engineering, Xi'an University of Architecture and Technology, Xi'an, Shaanxi, China. ²Key Laboratory of Manufacturing Systems Engineering, Xi'an Jiaotong University, Xi'an, People's Republic of China.
