Preparation of submicron-sized quasi-spherical silica particles via ultrafine grinding with chemical-dissolution assistance

Jiaying Chen, Zhidong Pan, Yanmin Wang

PII: S0032-5910(18)30592-8
DOI: doi:[10.1016/j.powtec.2018.07.093](https://doi.org/10.1016/j.powtec.2018.07.093)
Reference: PTEC 13575
To appear in: *Powder Technology*
Received date: 28 May 2018
Revised date: 14 July 2018
Accepted date: 25 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Preparation of submicron-sized quasi-spherical silica particles *via* ultrafine grinding with chemical-dissolution assistance

Jiaying Chen, Zhidong Pan* and Yanmin Wang*
