

Accepted Manuscript

Development of control algorithms for optimal thermal environment of double skin envelope buildings in summer

Jin Woo Moon, Jin Chul Park, Sooyoung Kim

PII: S0360-1323(18)30480-3

DOI: [10.1016/j.buildenv.2018.08.011](https://doi.org/10.1016/j.buildenv.2018.08.011)

Reference: BAE 5624

To appear in: *Building and Environment*

Received Date: 13 May 2018

Revised Date: 29 July 2018

Accepted Date: 6 August 2018

Please cite this article as: Moon JW, Park JC, Kim S, Development of control algorithms for optimal thermal environment of double skin envelope buildings in summer, *Building and Environment* (2018), doi: 10.1016/j.buildenv.2018.08.011.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Development of Control Algorithms for Optimal Thermal Environment
of Double Skin Envelope Buildings in Summer**
