

## Accepted Manuscript

Title: Metabolism and adult neurogenesis: towards an understanding of the role of lipocalin-2 and iron-related oxidative stress

Authors: Ana Catarina Ferreira, Nuno Sousa, João M. Bessa, João Carlos Sousa, Fernanda Marques

PII: S0149-7634(18)30280-X  
DOI: <https://doi.org/10.1016/j.neubiorev.2018.09.014>  
Reference: NBR 3221

To appear in:

Received date: 18-4-2018  
Revised date: 20-9-2018  
Accepted date: 20-9-2018

Please cite this article as: Ferreira AC, Sousa N, Bessa JM, Sousa JC, Marques F, Metabolism and adult neurogenesis: towards an understanding of the role of lipocalin-2 and iron-related oxidative stress, *Neuroscience and Biobehavioral Reviews* (2018), <https://doi.org/10.1016/j.neubiorev.2018.09.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Metabolism and adult neurogenesis: towards an understanding of the role of lipocalin-2 and iron-related oxidative stress**

**Highlights**

- Nutrient signals and metabolism control quiescent NSCs transition to activate states
- Energy metabolism from glycolysis to mitochondrial phosphorylation regulates NSCs function
- Adult neurogenesis transiently generates oxidative stress
