Effects of heat treatment and lubricant on magnetic properties of iron-based soft magnetic composites with Al₂O₃ insulating layer by one-pot synthesis method

Jian Lei, Jingwu Zheng, Haida Zheng, Liang Qiao, Yao Ying, Wei Cai, Wangchang Li, Jing Yu, Min Lin, Shenglei Che

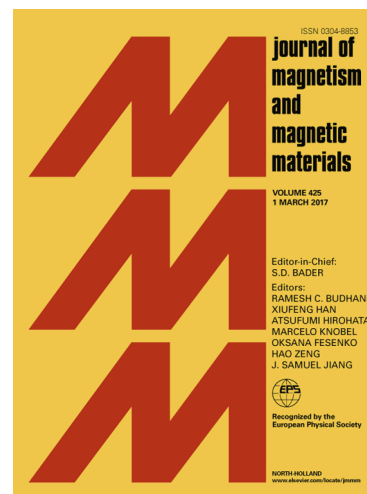

PII: S0304-8853(18)32331-X
DOI: <https://doi.org/10.1016/j.jmmm.2018.09.125>
Reference: MAGMA 64408

To appear in: *Journal of Magnetism and Magnetic Materials*

Received Date: 25 July 2018
Revised Date: 24 September 2018
Accepted Date: 30 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
