Title: Improvement of *in vitro* ileal dry matter digestibility by non-starch polysaccharide degrading enzymes and phytase is associated with decreased hindgut fermentation

Authors: Z.K. Zeng, J.L. Zhu, G.C. Shurson, C. Chen, P.E. Urriola

PII: S0377-8401(18)30220-7
DOI: <https://doi.org/10.1016/j.anifeedsci.2018.09.006>
Reference: ANIFEE 14064

To appear in: *Animal Feed Science and Technology*

Received date: 18-2-2018
Revised date: 15-7-2018
Accepted date: 17-9-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Running head: *In vitro* efficacy of carbohydrases

Improvement of *in vitro* ileal dry matter digestibility by non-starch polysaccharide degrading enzymes and phytase is associated with decreased hindgut fermentation
