This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Suicide risk is more prevalent in bipolar disorder than in unipolar depression;
- Subjects at risk for bipolar disorder showed high prevalence of suicide risk;
- Suicide risk was higher in subjects who converted to bipolar disorder.
