Ruben Rios is a postdoctoral researcher in the Computer Science Department at the University of Malaga. His main research activities are centred on the design and development of solutions for the protection of digital privacy and anonymity in resource constrained devices, like cellular networks, wireless sensor networks, and the Internet of Things. Dr. Rios has also participated in a number of national and international projects and he has been involved in the technical programme committee of multiple international conferences. He is one of the authors of the book Location Privacy in Wireless Sensor Networks from CRC Press.

Carmen Fernadez-Gago is a postdoctoral researcher at the Department of Computer Science at the University of Malaga, where she leads a project funded by the Spanish government for young researchers. Her main research interest is in the area of formal specification of trust and reputation management.

She has published many research papers in the topic and has participated in a number of national
