Title: Improving Particle Swarm Optimization via Adaptive Switching Asynchronous - Synchronous Update

Author: Nor Azlina Ab Aziz Zuwairie Ibrahim Marizan
Mubin Sophan Wahyudi Nawawi Mohd Saberi Mohamad

PII: S1568-4946(18)30435-6
DOI: <https://doi.org/doi:10.1016/j.asoc.2018.07.047>
Reference: ASOC 5015

To appear in: *Applied Soft Computing*

Received date: 29-7-2015
Revised date: 11-5-2018
Accepted date: 24-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight:

1. Switch-PSO use hybrid iteration strategy.
2. It adaptively switches between asynchronous update to synchronous update vice versa if the performance of best member is static for a number of iteration.
3. Results show that Switch-PSO is significantly better than PSO with traditional iteration strategy
4. All of the reviewers' comments are addressed.
5. The manuscript is sent to English editing service
6. The proposed algorithm is applied to real world problem of IIR modelling for system identification.
