Title: Application of response surface methodology and artificial neural network modeling to assess non-thermal plasma efficiency in simultaneous removal of BTEX from waste gases: Effect of operating parameters and prediction performance

Authors: Ahmad Hosseinzadeh, Ali Asghar Najafpoor, Ahmad Jonidi Jafari, Reza Khani Jazani, Mansour Baziar, Hasan Bargozi, Fardin Ghasemy Piranloo

PII: S0957-5820(18)30659-1
DOI: <https://doi.org/10.1016/j.psep.2018.08.010>
Reference: PSEP 1480

To appear in: *Process Safety and Environment Protection*

Received date: 21-4-2018
Revised date: 7-8-2018
Accepted date: 8-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Application of response surface methodology and artificial neural network modeling to assess non-thermal plasma efficiency in simultaneous removal of BTEX from waste gases: Effect of operating parameters and prediction performance
