Title: Liquid-liquid extraction-based process concepts for recovery of carboxylic acids from aqueous streams evaluated for dilute streams

Authors: Ehsan Reyhanitash, Thomas Brouwer, Sascha R.A. Kersten, A.G.J. van der Ham, Boelo Schuur

PII: S0263-8762(18)30388-5
DOI: <https://doi.org/10.1016/j.cherd.2018.07.038>
Reference: ChERD 3292

To appear in:

Received date: 18-4-2018
Revised date: 27-6-2018
Accepted date: 26-7-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Liquid-liquid Extraction-Based Process Concepts for
Recovery of Carboxylic Acids from Aqueous Streams
Evaluated for Dilute Streams

Ehsan Reyhanitash[†], Thomas Brouwer[†], Sascha R.A. Kersten,
A.G.J. van der Ham, Boelo Schuur

University of Twente, Sustainable Process Technology group,
Faculty of Science and Technology

[†]These authors contributed equally.
