

## Accepted Manuscript

Phenomenological prediction of desalination brines nanofiltration through the indirect determination of zeta potential

Paloma Ortiz-Albo, Raquel Ibañez, Ane Urriaga, Inmaculada Ortiz

PII: S1383-5866(18)31163-8  
DOI: <https://doi.org/10.1016/j.seppur.2018.08.066>  
Reference: SEPPUR 14887

To appear in: *Separation and Purification Technology*

Received Date: 4 April 2018  
Revised Date: 13 August 2018  
Accepted Date: 29 August 2018

Please cite this article as: P. Ortiz-Albo, R. Ibañez, A. Urriaga, I. Ortiz, Phenomenological prediction of desalination brines nanofiltration through the indirect determination of zeta potential, *Separation and Purification Technology* (2018), doi: <https://doi.org/10.1016/j.seppur.2018.08.066>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title**

**“Phenomenological prediction of desalination brines nanofiltration  
through the indirect determination of zeta potential”**

Authors: Paloma Ortiz-Albo, Raquel Ibañez, Ane Urtiaga\*, Inmaculada Ortiz

Affiliation: Department of Chemical and Biomolecular Engineering. University of  
Cantabria  
Av. Los Castros s/n. 39005 Santander. Spain

\*Corresponding author: Ane Urtiaga  
E-mail: urtiaga@unican.es

Review on Manuscript ID: SEPPUR\_2018\_1118

Submitted to

Separation and Purification Technology

August 2018
