Accepted Manuscript

Temporal instability of a viscoelastic liquid thread in the presence of a surrounding viscoelastic fluid

Claudiu Patrascu, Corneliu Balan

PII: S0377-0257(18)30252-0
DOI: https://doi.org/10.1016/j.jnnfm.2018.09.002
Reference: JNNFM 4048

To appear in: *Journal of Non-Newtonian Fluid Mechanics*

Received date: 19 July 2018
Revised date: 13 September 2018
Accepted date: 15 September 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- The elasticity of the external medium has a stabilizing effect on a liquid thread.
- If two fluids with equal elasticity the system behaves as if it were Newtonian.
- The most unstable combination: inner viscoelastic outer Newtonian fluid.
