

## Accepted Manuscript

Cost-effective biodiesel production from wet microalgal biomass by a novel two-step enzymatic process

Yongjin He, Tao Wu, Xiaofei Wang, Bilian Chen, Feng Chen

PII: S0960-8524(18)31141-6  
DOI: <https://doi.org/10.1016/j.biortech.2018.08.038>  
Reference: BITE 20321

To appear in: *Bioresource Technology*

Received Date: 25 June 2018  
Revised Date: 9 August 2018  
Accepted Date: 10 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
