This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A maintenance procedure for worse than old repair is studied.
- A general failure process based on the Generalized Pólya Process is considered.
- Comparison with the minimal repair policy is performed.
