

# Accepted Manuscript

Improvement of methanogenic activity of anaerobic digestion using poly(L-lactic acid) with enhanced chemical hydrolyzability based on physicochemical parameters

Takeshi Yamada, Hideto Tsuji, Hiroyuki Daimon

PII: S0301-4797(18)30905-8  
DOI: 10.1016/j.jenvman.2018.08.034  
Reference: YJEMA 7855  
To appear in: *Journal of Environmental Management*  
Received Date: 28 April 2018  
Accepted Date: 07 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Title:**

**Improvement of methanogenic activity of anaerobic digestion using poly(L-lactic acid) with enhanced chemical hydrolyzability based on physicochemical parameters**

**Authors:**

Takeshi Yamada <sup>a,\*</sup>, Hideto Tsuji <sup>a</sup>, and Hiroyuki Daimon <sup>a,b</sup>

**Address:**

<sup>a</sup> Department of Environmental and Life Sciences, Toyohashi University of Technology, Toyohashi, Aichi 441-8580, Japan

<sup>b</sup> Institute for Global Network Innovation in Technology Education, Toyohashi University of Technology, Toyohashi, Aichi 441-8580, Japan

**Corresponding author:**

\* Takeshi Yamada
