

## Accepted Manuscript

X-ray fluorescence-based methods to measure the thickness of protective organic coatings on ancient silver artefacts

S. Porcinai, M. Ferretti

PII: S0584-8547(18)30049-1

DOI: doi:[10.1016/j.sab.2018.08.001](https://doi.org/10.1016/j.sab.2018.08.001)

Reference: SAB 5506

To appear in: *Spectrochimica Acta Part B: Atomic Spectroscopy*

Received date: 30 January 2018

Revised date: 8 August 2018

Accepted date: 8 August 2018

Please cite this article as: S. Porcinai, M. Ferretti , X-ray fluorescence-based methods to measure the thickness of protective organic coatings on ancient silver artefacts. *Sab* (2018), doi:[10.1016/j.sab.2018.08.001](https://doi.org/10.1016/j.sab.2018.08.001)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
